Subject: Letter of Recommendation for Mr. Jeffrey Gassman

Dear Mr. Goldberg,

Mr. Jeffrey Gassman worked for Alexion Pharmaceuticals as Regulatory Consultant from October to January 2004 to perform a compliance assessment preparing Alexion for pre-approval inspection. His assessment included review of technical reports and procedures, development of procedures, providing training on specific standards, performing a gap analysis of Alexion systems and procedures, and auditing laboratory systems and operations. Upon completion, Mr. Gassman presented his assessment to Alexion senior management. During the course of his consulting, he met and exceeded our expectations as a capable and expert professional, who effectively presented deficiencies and constructively offered reasonable and realistic recommendations.

I was quite impressed by Mr. Gassman's ability to perform in-depth reviews of technical documents and to generate comprehensive and detailed summaries of his assessment in a short period of time. His summary reports were clear, concise and objective. He responded to questions and opposing views diplomatically and professionally.

Overall, Jeff demonstrated his thorough knowledge and expertise in regulatory / compliance requirements. Since his completion of the assessment of Alexion, we have sought his review and input on additional matters of concern and we expect to continue to call upon his expertise in the future. I strongly recommend Mr. Gassman for consulting services as a very qualified Regulatory Consultant.

Sincerely,

Sigita Wallace
Director, Quality Assurance
