Robert,

I would like to thank you to have selected Mr. Jeffrey Gassman for the review of the computerized system qualification protocols of Lyophilizer and steam sterilizer. For the past week, we have been involved with him for the review of the protocol of the second computerized system for the lyophilizer, and as first experience, his expertise and willingness to help us was preidential. We will continue to work with him for the computerized system of the new steam sterilizer to be installed in November 2001.

Ilefebvre
